

Manage Your Entire Contingent Workforce of Staffing Suppliers, Alumni, and Independent Consultants

Consultants/contractors/freelancers and workers engaged through staffing suppliers are an important part of the modern workforce. Unmanaged, these sources of labor can be expensive and present tax and labor risks. Yurcor offers a comprehensive solution for engaging all forms of contingent labor in a cost-effective manner without exposing your business to unnecessary risk.

Manage Your Staffing Suppliers

Managing many staffing suppliers can be a time-consuming headache. Yurcor Vendor Management ensures that suppliers are qualified to do business with you and that services are delivered according to contract terms. Yurcor can manage your entire supplier base or only the smaller second-tier suppliers who present most of the work and risk. Yurcor's vendor-neutral position eliminates vendor reluctance to participate in a managed environment.

Automate Consultant Procurement

Managing staffing requisitions can be a job in itself. Yurcor provides a simple, measurable and repeatable process for delivering requisitions to your pool of staffing suppliers over the web. Yurcor also works to reduce costs by negotiating rates that meet your budget.

Add top Consultants to Your Talent Pool

The top people in many fields work as independent contractors. If you won't hire them because of the tax and labor risk, you miss some of the very best talent. Yurcor's web-based Independent Contractor Qualification enables you to determine whether these top people can be engaged as independent contractors or should be paid as employees.

Engage Consultants in a Compliant Manner

Alumni and consultants who do not qualify to be paid as independent contractors can be engaged through Yurcor's Employer of Record service. This offers workers top-quality health and retirement benefits while ensuring that consultants are paid in compliance with tax and labor laws.

Automate Time and Expense Processing and Billing

Using the web to enter and approve time and expenses saves time and eliminates errors. Billing can be consolidated to provide further savings. Web based time and billing makes this process better for everyone.

Get Started Today

Yurcor's web-based systems and reliable customer service make it easy to start managing your contingent workforce without buying and installing software. Ask your Yurcor representative how these services can be had without increasing your contingent workforce budgets.

For Business

"Yurcor's ability to form effective working relationships with suppliers has given them a lot of credibility with me. Strengths would be negotiation of rates, follow up and overall solid communication skills. I always know current status."
