

Grow your staffing business without spending a fortune on systems.

Clients have come to expect web-based systems for delivering staffing services. With Yurcor's complete "req-to-check" back office solution, you can focus on the client service and recruiting that differentiate you from competitors.

Enable Clients to Order from you over the Web

Be the first to get the order and fill orders faster by enabling clients to submit job orders through a simple web interface.

Source from Subcontracting Suppliers

Increase your fill rates by submitting requisitions to partners or subcontracting suppliers electronically in those instances when you do not have the right candidate in-house.

Qualify Independent Contractors

Protect yourself and your clients from tax and labor liabilities by qualifying individuals who claim independent contractor status. You can also create an additional revenue stream by offering this online solution as an additional service to clients.

Use Employer of Record Services to Recruit Top Talent

Tap into the pool of top consultants who think they are above working for a staffing supplier by engaging them through Yurcor's Employer of Record service. You can also use this service to offer top-quality health and retirement benefits to your entire workforce.

Process Time & Expenses over the Web

Streamline payroll processing and eliminate mistakes by enabling workers to enter time and expenses and clients to approve them online.

Bill Clients Electronically

Accelerate your cash flow by billing clients directly from approved time and expenses. Invoices can be consolidated to provide additional savings.

Reduce your Support Burden

Use web-based self-service to enable your workforce to answer common questions without calling your support team.

Get Started Today

Yurcor's web-based systems make it fast and easy to get started without buying and installing a lot of software. Systems can be co-branded with your corporate identity and are available as a stand-alone solution or in combination with Yurcor's service team. Do what you do best, and outsource the rest with Yurcor.

For Staffing Firms

"When competing for new business, Yurcor gives us an edge because we offer an automated solution."
